METRASLATE

MetraSlate: Asset + Standard

Pilot / Early Access

Equipment. Customer Work. Technical Records.

ASSET AND STANDARD

Manage Equipment and the Business Around It

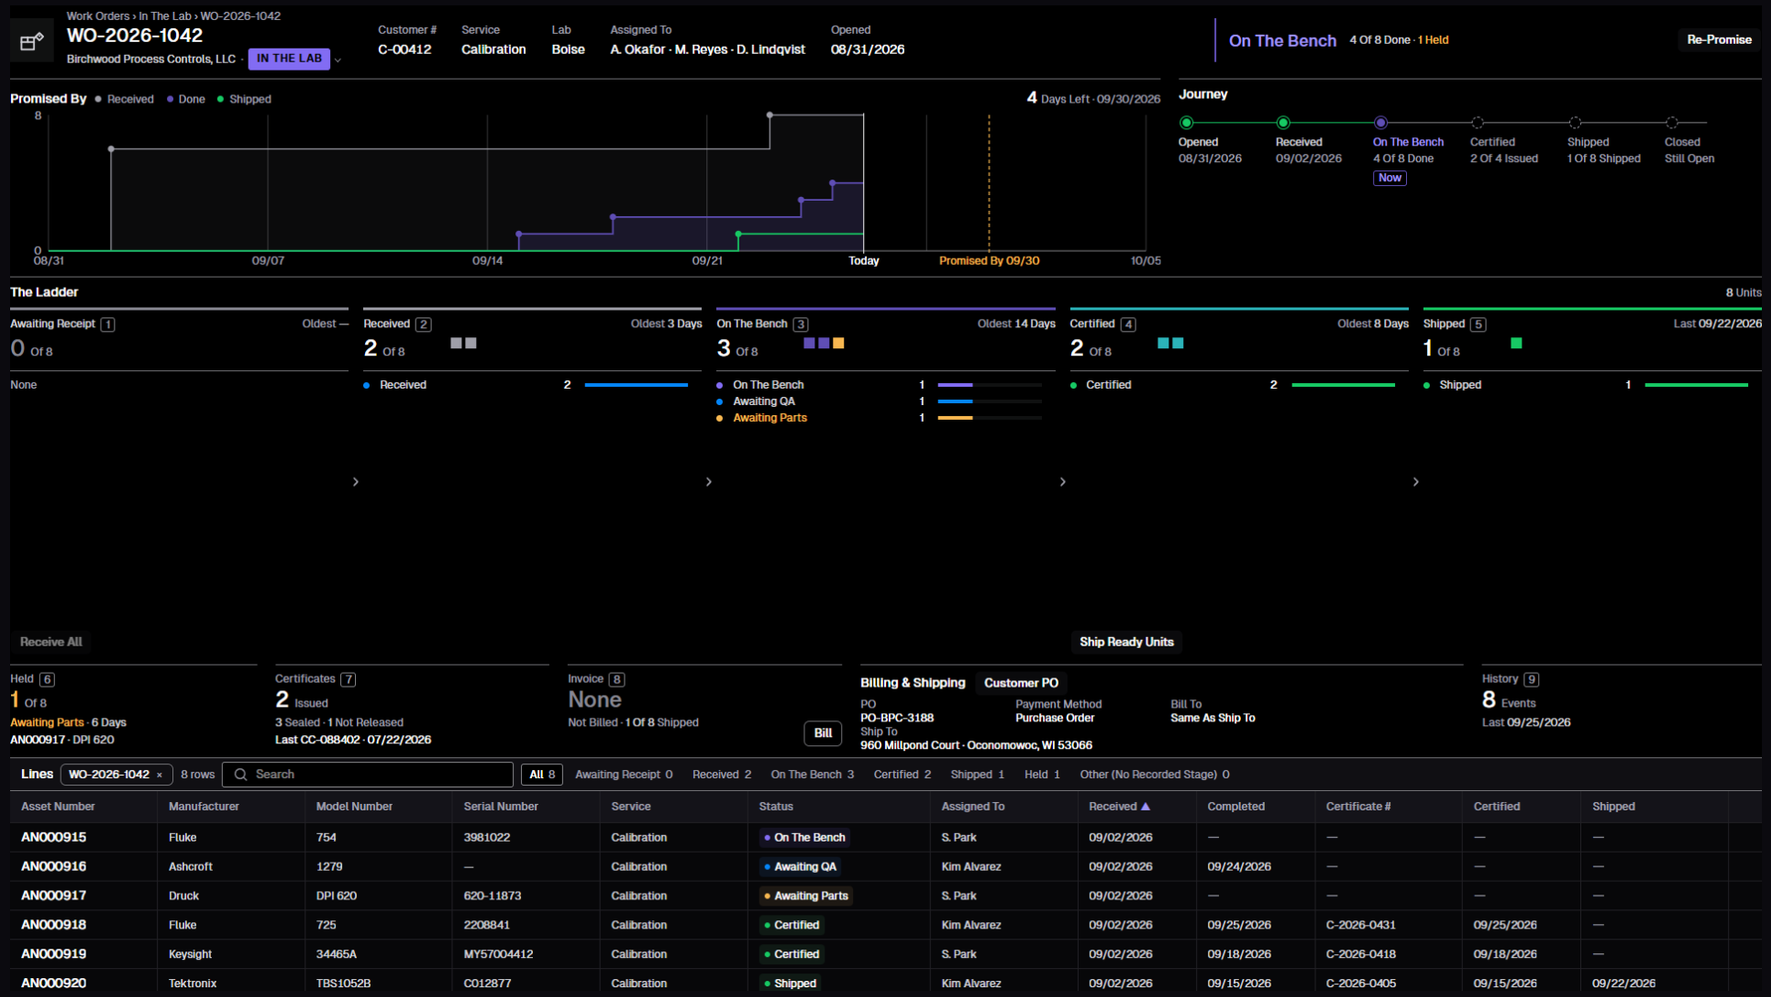

Keep equipment, customers, service work, purchasing and financial records connected.

An equipment owner and its calibration provider have different responsibilities. Asset and Standard are designed around those responsibilities while preserving the service relationship.

Asset by MetraSlate	General equipment management and business operations: equipment identity, location, service history, customers, purchasing, personnel and invoicing.
Standard by MetraSlate	That foundation developed for an industry's workflows, methods and records. Specialization determines the edition.
Metrology Edition	The first Standard edition connects laboratory operations with approved calibration templates, measurements, reference standards, uncertainty, technical review and certificates.

FROM AGREEMENT TO SERVICE

Follow Each Instrument Through the Job

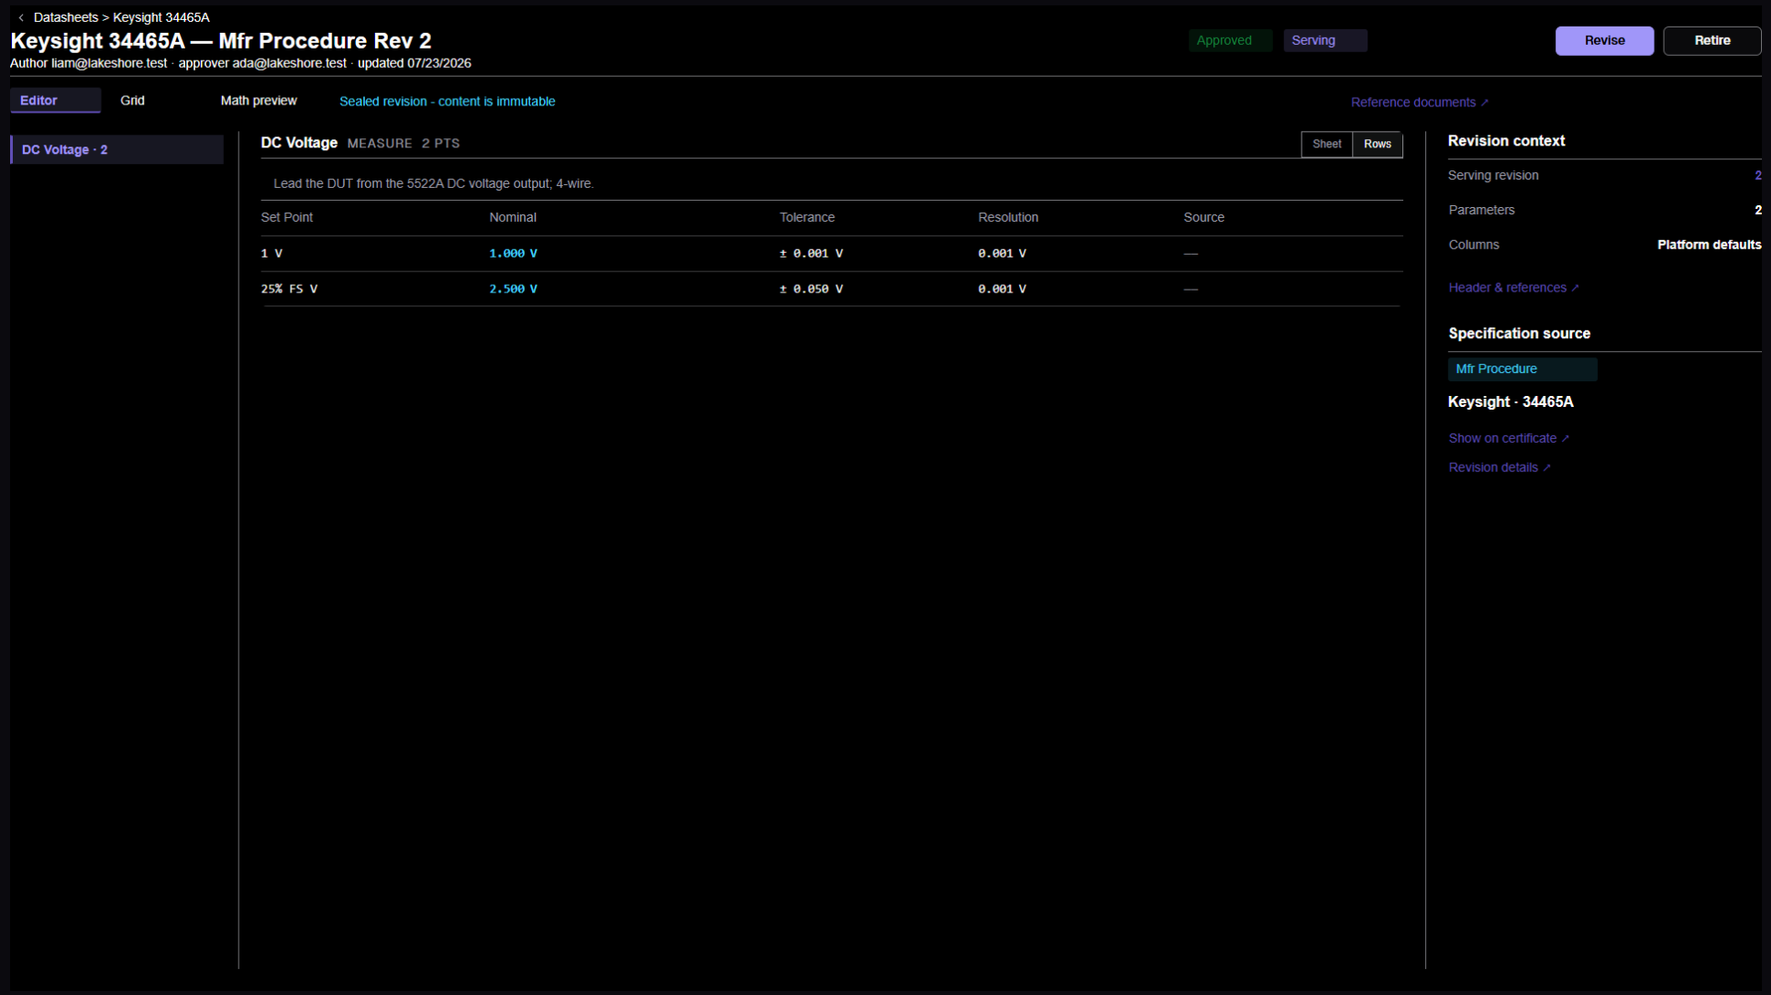

Follow the affected instrument from approved service through progress and holds, while keeping the customer order in view.

Demonstration with sample data.

REUSABLE TECHNICAL WORK

Prepare the Model, Then Use It for Each Instrument

Use approved measurement points and specifications for each run, retaining the selected datasheet revision and the instrument's own observations.

Demonstration with sample data.

CALCULATION AND REVIEW

Inspect the Basis Behind the Result

150 psi

Setup | Calculation | Method reference

Point 1 of 2 ‹ ›

Contributions

Contributor 1 of 2 ‹ › u in psi

Fluke 2700G Measure · Instrument Side — 0.05774 psi

0 × 150 psi + 0.1 psi = 0.1 psi ÷ √3 × 1

Spec Row 0 to 500 psi · Manufacturer · Rectangular

Uncertainty		Decision	
Resolution	0.2887 psi 1 psi	Limits	147 to 153 psi
Process u	0.06932 psi √(0.05774² + 0.03837²)	Guard Band	Simple Acceptance · 0 psi
Combined u	0.2969 psi √(0.06932² + 0.2887²)	TUR	21.6:1 6 ÷ (2 × 0.1386)
Coverage	k = 2 · 95.45 %	TUR Gate	Pass · 5.05 School A
Reported U	0.59 psi 2 × 0.2969	Evaluated	151 psi 09/29/2026
U95	0.1386 psi 2 × 0.06932 · School B	Result	Pass

Review the reference contributions, uncertainty, limits and decision policy alongside the measurement before releasing its certificate.

Component preview · sample data.

OPERATING VISIBILITY

See What the Business Earns and Spends

Work and Quality

Inspect throughput, turnaround, first-pass results and returns. Open the records behind a recurring delay or quality issue.

Invoices and Balances

Follow accepted terms into invoices, recorded receipts, credits and overdue balances. Keep the reason for a charge retrievable.

Financial Statements

Review revenue, cost of service, expenses and net income from posted journal movements. Complete postings and account mapping determine the result.

Deeper Job Costing

Labor events and purchasing records provide a foundation. Automatic per-job labor, reference-equipment and overhead allocation remains in development.

THE WIDER FAMILY

Extend the Foundation Where It Fits

Choose Asset or the relevant Standard edition around the work you need to manage. The wider ecosystem describes additional opportunities, not prerequisites for using either product.

Asset Light	Focused equipment management: identity, location, service history and supporting records. Full Asset adds the broader business operations.
Metrologistics	A proposed marketplace connecting equipment owners with service providers. The intended flow covers requests, provider offers and the resulting service relationship.
Further Standard Editions	Public Safety is in development for agency operations and readiness. Traceability is in design for requirements, attributed actions and evaluation of AI-assisted work.

CURRENT SCOPE AND ADOPTION

Start With One Representative Workflow

Pilot / Early Access. Agree the operating scope before rollout.

Bring the Work	Use an authorized equipment sample and a recurring job. Identify the users, handoffs and result that will determine whether the system fits.
Define the Setup	Agree enabled workflows, package scope, migration, external connections, support, recovery and export responsibilities.
Measure the Outcome	Compare repeated entry, review effort, time to invoice and evidence retrieval against the current process.

Screens show Standard by MetraSlate: Metrology Edition components with sample data. Standalone Asset configuration and cross-company service sharing require their own acceptance. Automated customer payment collection remains in development.
